Learnova School AI

PRODUCT BROCHURE · 2026

One connected school. Every decision better informed.

Enterprise school management intelligence for the modern school.

A practical guide for school owners, principals, administrators, finance leaders and operations teams.

THE LEARNOVA DIFFERENCE

One learner record connects the whole school.

Learnova brings administration, teaching, finance, HR, parent engagement and school operations into a shared, permission-controlled workspace.

01	02	03	04	05
ADMIT	PLACE	TEACH	COLLECT	INFORM
Application & guardian	Section & class	Learning & assessment	Invoice & payment	Parent & leadership

01

Less repeated administration

- Departments reference shared school and learner records.
- Role-specific workspaces keep responsibilities clear.
- Configurable structures reflect the school's sections.

02

Decisions with context

- Dashboards draw on daily academic and finance activity.
- Custom reports shape permitted information around a question.
- Audit and review steps support accountable action.

03

Value you can verify

- Begin with one important workflow.
- Use a controlled demonstration and pilot.
- Measure against your current process—no invented savings.

Marketing interfaces in this brochure are illustrative and contain sample data only. Provider activation and unverified outcomes are identified explicitly.

BUILT AROUND RESPONSIBILITIES

Every stakeholder gets a relevant view—not unrestricted access.

The linked school, learner and guardian records connect the work while role and class permissions define what each person can see.

01

Owners & principals

- School-wide dashboards and custom reports
- Admissions, finance, staffing and operations visibility
- Pilot scope, approvals and measurable review

02

Administrators & registrars

- Applications, profiles, documents and guardians
- Class placement, promotion, transfer and history
- Years, terms, classes, subjects and grading setup

03

Teachers & academic leaders

- Timetable, attendance, diary and behaviour
- Assignments, quizzes, materials and assessment
- AI-assisted preparation with staff review

04

Finance officers & bursars

- Fees, invoices, payments, arrears and refunds
- Budgets, expenses, procurement and payroll
- Ledger, reconciliation, assets and finance reports

05

HR & operations teams

- Recruitment, onboarding, contracts and appraisals
- Online forms, letters, leave and staff self-service
- Transport, boarding, clinic, library and inventory

06

Parents & guardians

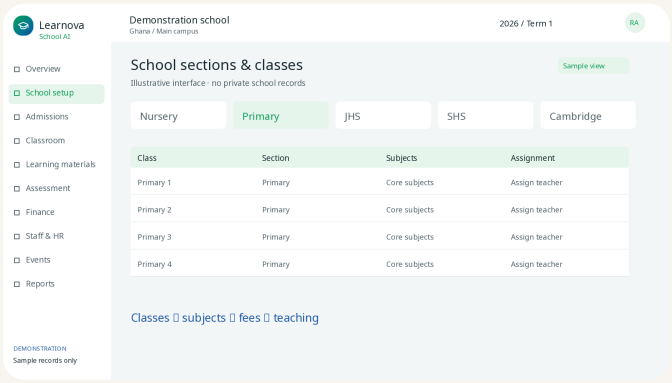
- Ward-linked homework, grades and timetable
- Class materials, reports, fees and school events
- Feedback and permitted payment options

A parent’s experience follows the linked child. Staff access follows school and role. Sensitive records are not a whole-school noticeboard.

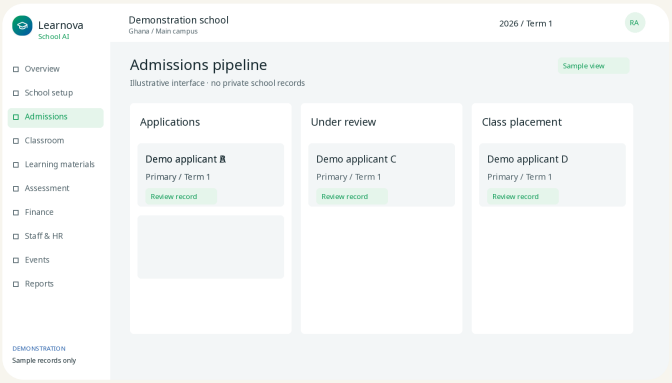
A RELIABLE FOUNDATION

Structure the school. Admit once. Keep the record continuous.

Campuses, terms, sections, classes and fee arrangements support every later workflow.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

School structure

- Multi-school and multi-campus setup
- Academic years, terms and grading
- Nursery, Primary, JHS, SHS and Cambridge sections
- Classes, subjects, fees and user assignments

02

Admissions

- Application pipeline and review
- Student and guardian profiles
- Supporting documents and class placement
- Pickup authorisation and linked family access

03

Student lifecycle

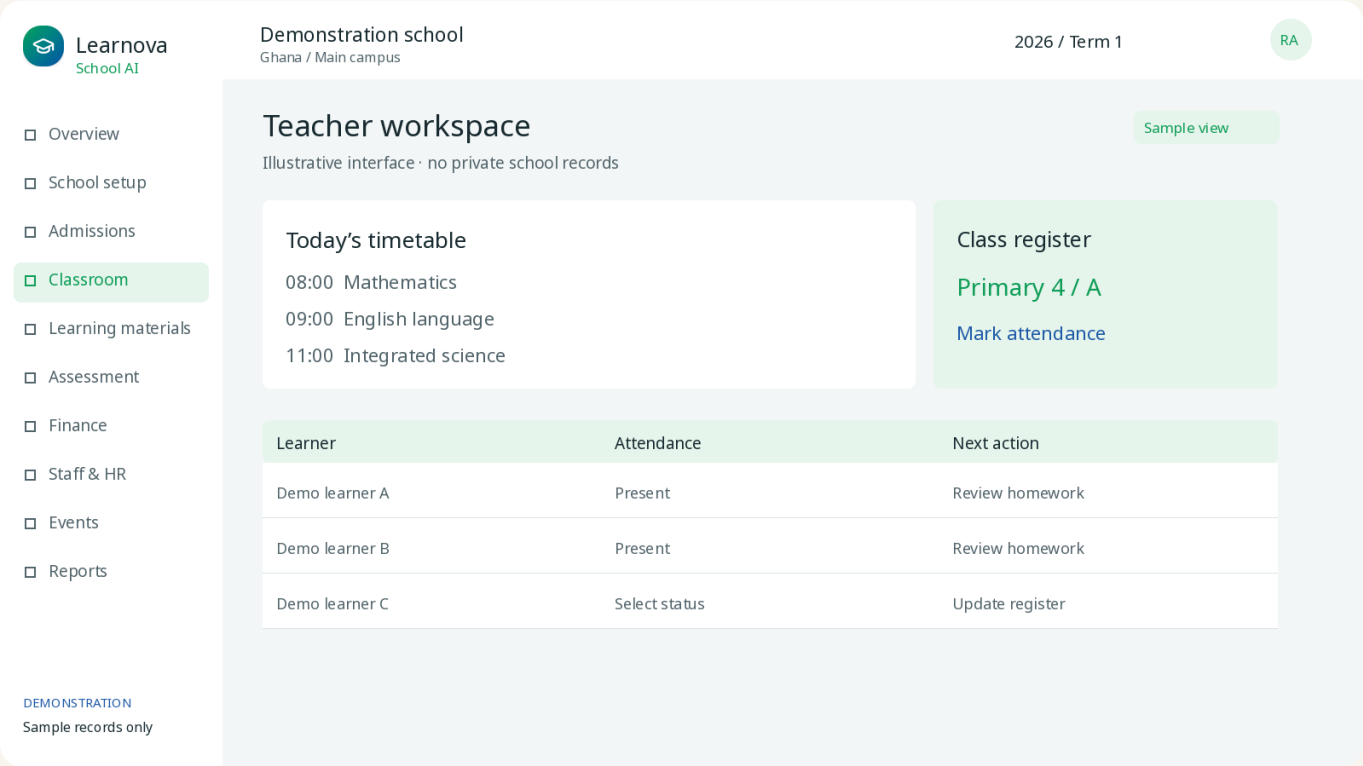
- Move learners between classes
- Promote at term end with a reason
- Record transfers and preserve class history
- Review teaching access and next-term fees

The same approved school structure supports class lists, teaching, billing and reporting. Controlled transitions avoid recreating a learner every year.

THE TEACHER'S WORKING DAY

From the class register to the next learning task.

Teachers organise the day, capture activity and publish work while leadership gains relevant visibility.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Plan

- Timetable and room allocation
- Curriculum, lesson and term planning
- Class requirements and teaching tutorials

02

Teach & record

- Attendance and class diary
- Participation and behaviour records
- Assignments, homework and class updates

03

Learn & practise

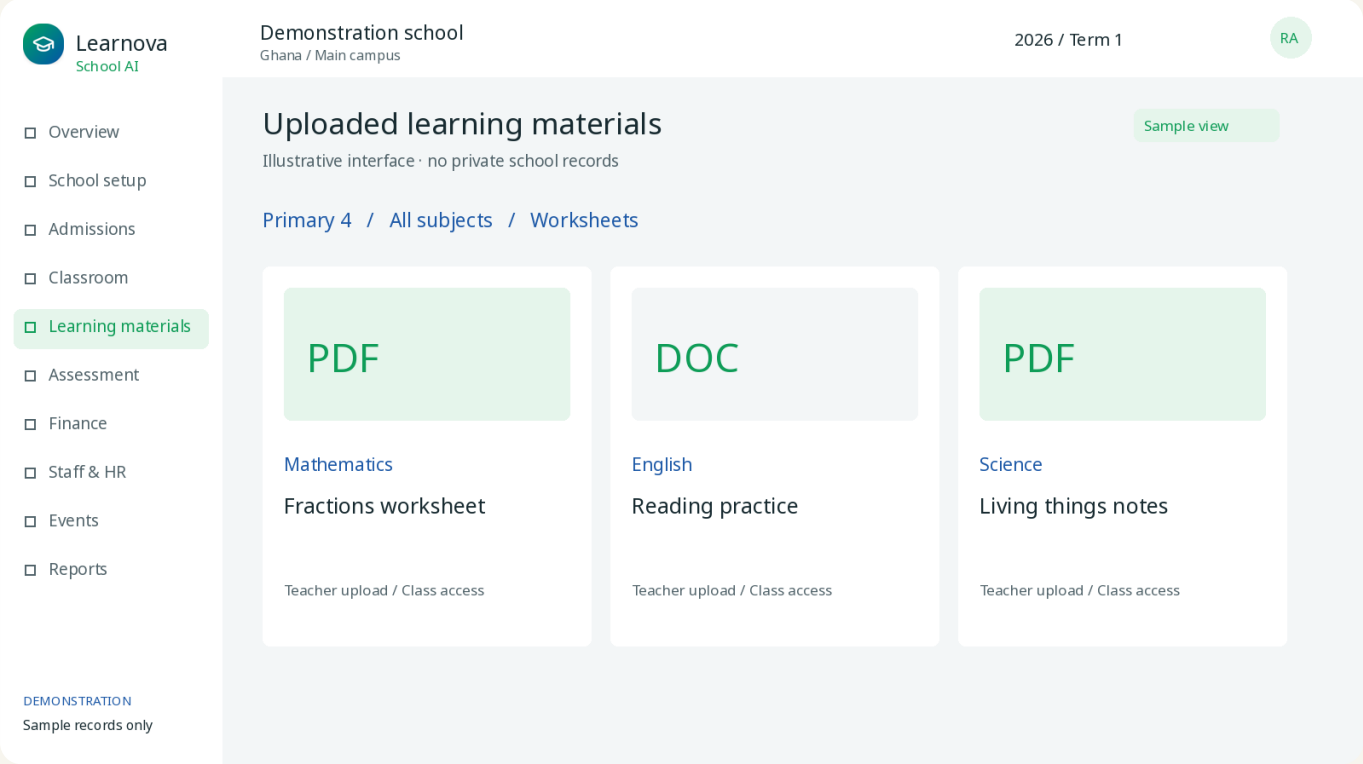
- Lessons, notes, videos and tutorials
- Online quizzes and CBT
- Student progress and permitted parent alerts

AI Tutor has been retired. Teaching resources come from school workflows and uploaded teacher or school materials; AI assistance remains subject to staff review.

TRUSTED RESOURCES

The right material, organised for the right class.

Schools and teachers upload resources, categorise them clearly and share them with the intended learners and families.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Upload & organise

- Notes, worksheets, reading and past questions
- Section, class, subject and material category
- School-owned and teacher-uploaded content

02

Controlled access

- Parents see permitted ward-class materials
- Learners study relevant class resources
- Private files follow school and class permissions

03

Physical library

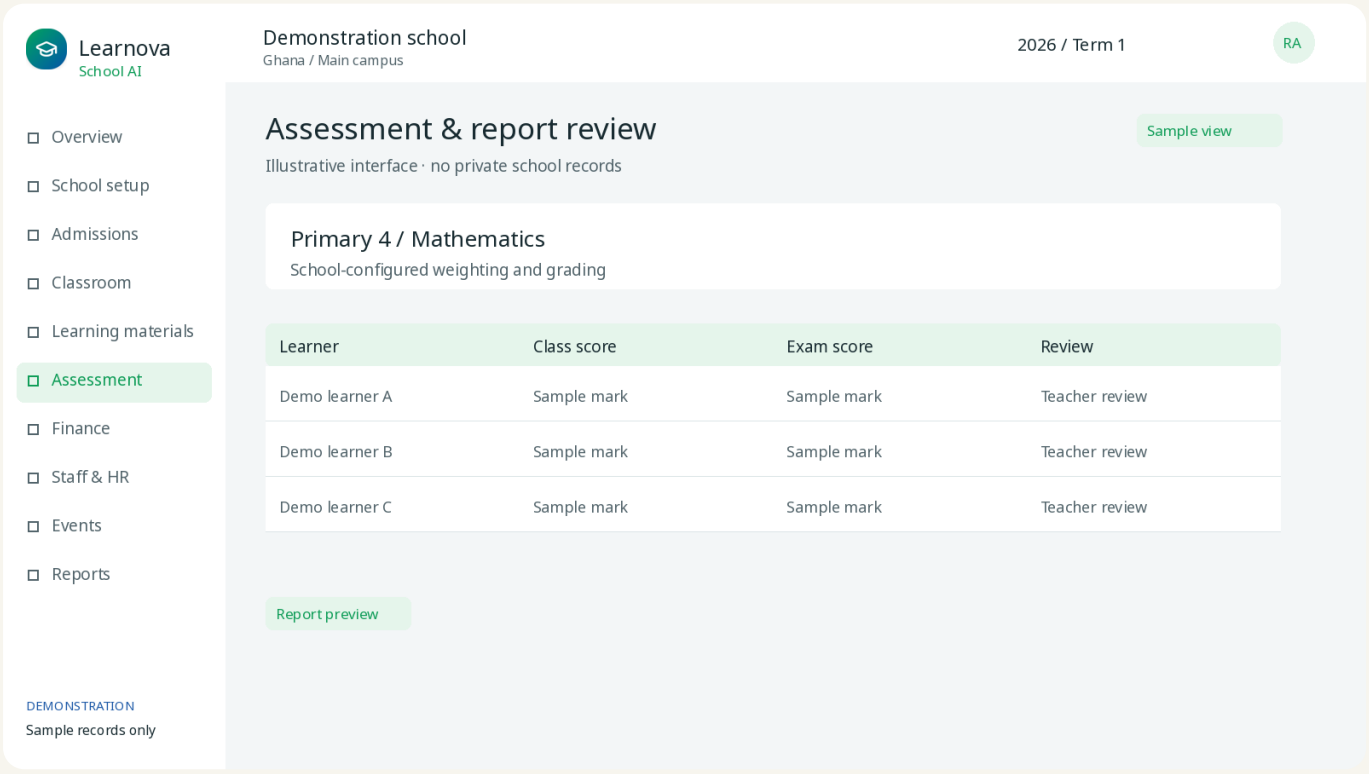
- Catalogue and lending records
- Loans, returns and reservations
- Fines and reading history where configured

The digital learning-material library is not an AI tutor. Physical-library cataloguing and lending remain a separate operational workflow.

EVIDENCE OF LEARNING

Marks become reviewed reports and timely conversations.

Teachers assess, administrators configure the rules, and families receive progress information through the appropriate portal.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Assess

- Question bank and mark entry
- Assignments, quizzes and continuous assessment
- Class-score and examination weightings

02

Report

- Automatic grade computation
- Report cards, remarks and performance views
- Review before sharing with parents

03

Configure

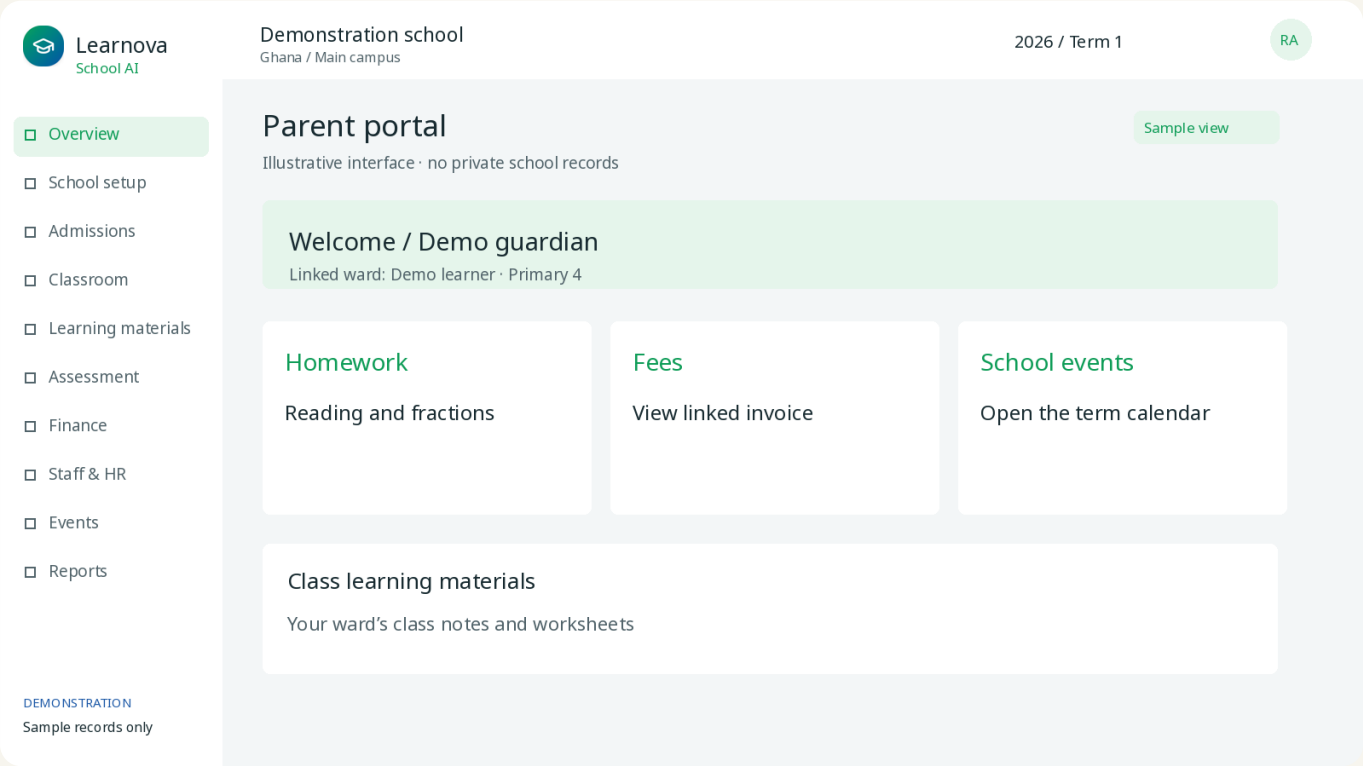
- School-specific grading bands
- BECE-style JHS and WASSCE-style SHS examples
- Academic dashboards and permitted exports

Configured BECE/WASSCE-style bands are school reporting options, not an official WAEC integration or endorsement. AI-drafted comments require staff review.

A WARD-LINKED EXPERIENCE

Parents find learning, fees and school updates in one place.

The parent portal follows the linked child, helping families understand the week without seeing another family's records.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Learning at home

- Homework, timetable and grades
- Reports and class learning materials
- Performance information and class requirements

02

Stay informed

- Announcements and classroom updates
- Parent-visible events and term calendar
- Transport information and feedback

03

Fees & communication

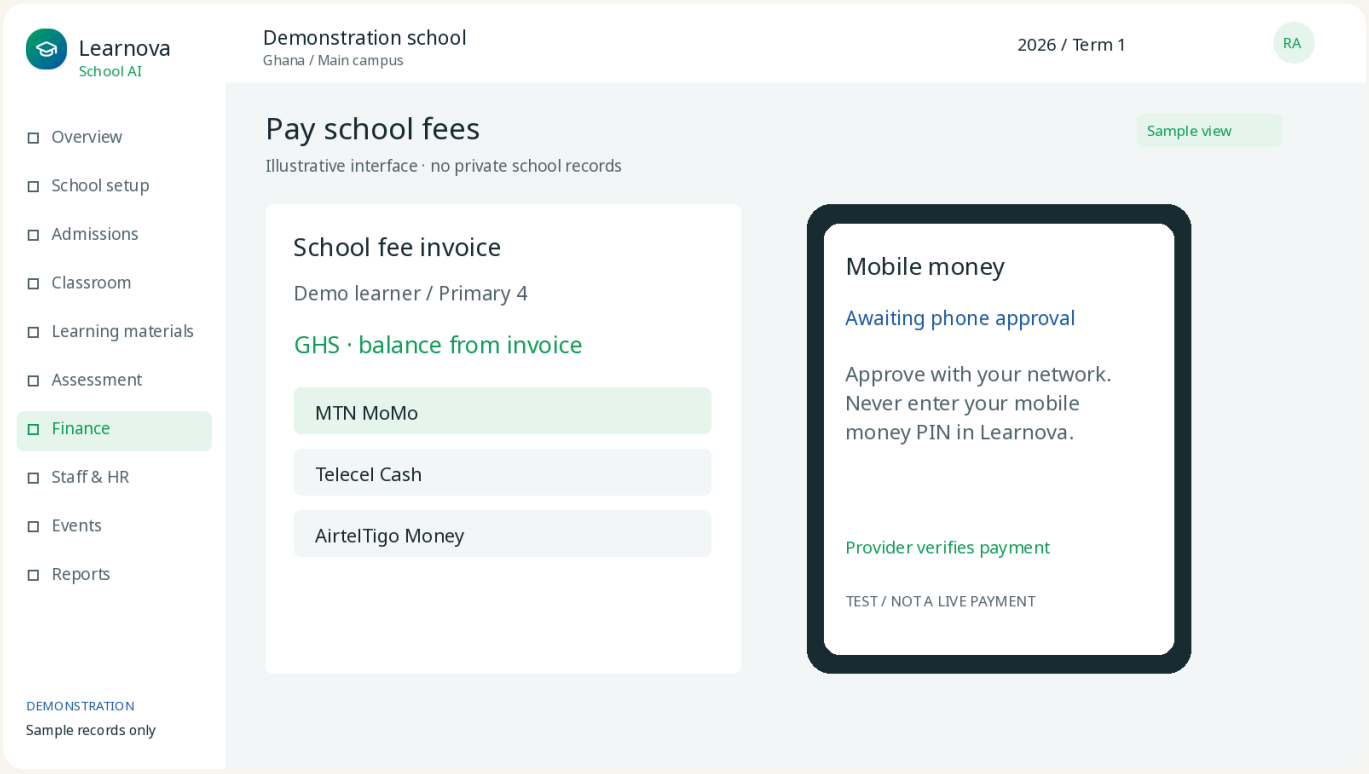
- Linked invoices and balances
- Enabled payment options and receipts
- Parent–teacher messaging and notifications

SMS, email, WhatsApp and push delivery depend on configured providers and school preferences. No automatic delivery outcome is assumed.

TRACEABLE COLLECTIONS

A familiar payment method with a controlled record.

Finance works from the same enrolment and fee structure as administration; payment confirmation must precede settlement.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Bill & follow up

- Class fee structures and student invoices
- Discounts, scholarships and receipts
- Arrears, reminders, refunds and balances

02

Mobile money journey

- MTN MoMo, Telecel Cash and AirtelTigo Money
- Parent selects a linked GHS invoice
- Network approval on the parent's phone

03

Payment controls

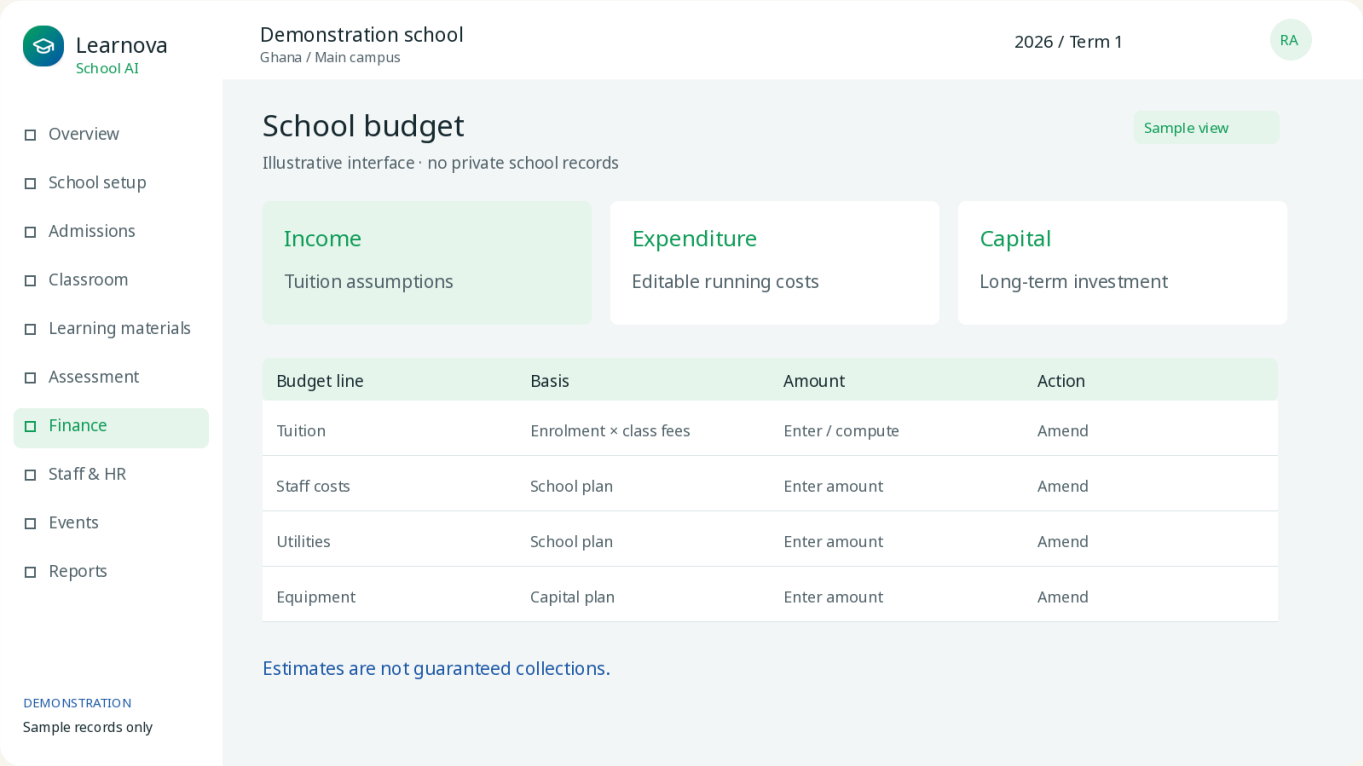
- Server validates the invoice balance
- Learnova never requests the mobile money PIN
- Provider confirms amount and settlement

ACTIVATION REQUIRED: Paystack credentials, school settings, applicable provider charges and successful end-to-end testing are required before live fee collection.

FROM PLAN TO LEDGER

Manage school money with connected financial workflows.

Budgets, daily transactions, payroll and accounting records give finance teams and leadership a common reference.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Plan & transact

- Income, recurring and capital budget templates
- Expenses, payables and receivables
- Suppliers, procurement and purchase orders

02

Payroll & treasury

- Payroll and payslip workflows
- Bank accounts, imports and reconciliation
- Wallet and treasury settlement records

03

Accounting & control

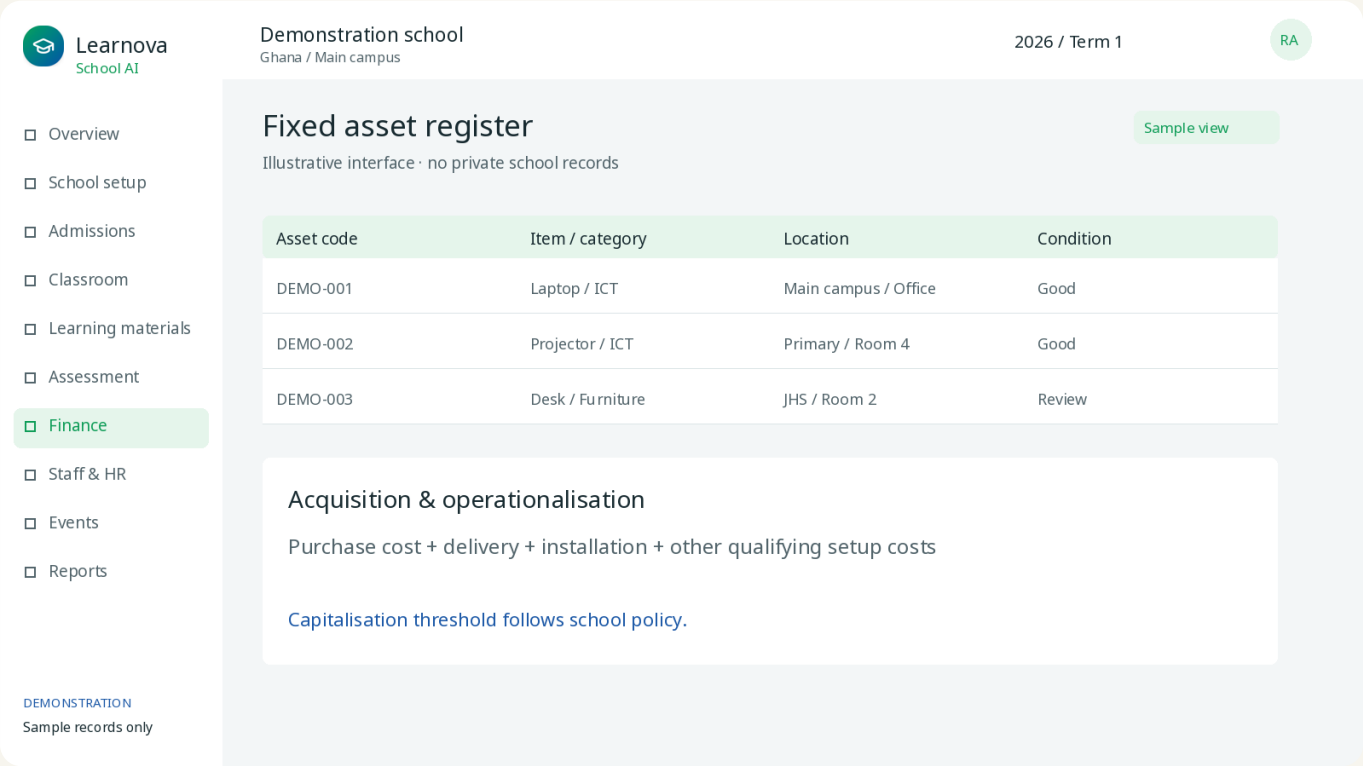
- Chart of accounts, journals and ledger
- Trial balance, fiscal periods and year-end
- Finance schedules, reports and audit trail

Tuition estimates use student counts and fee structures; they are not guaranteed collections. Finance configuration and accounting treatment require school review.

ACCOUNTABLE OWNERSHIP

Connect qualifying purchases to a coded asset record.

Capital expenditure can become a traceable fixed asset with its category, location and costs needed to put it into use.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Asset identity

- Automatic asset creation from qualifying capital expense
- School capitalisation threshold and categories
- Generated codes and assigned locations

02

Cost & condition

- Acquisition and operationalisation costs
- Condition and asset-register reporting
- Operational inventory records

03

Source & approve

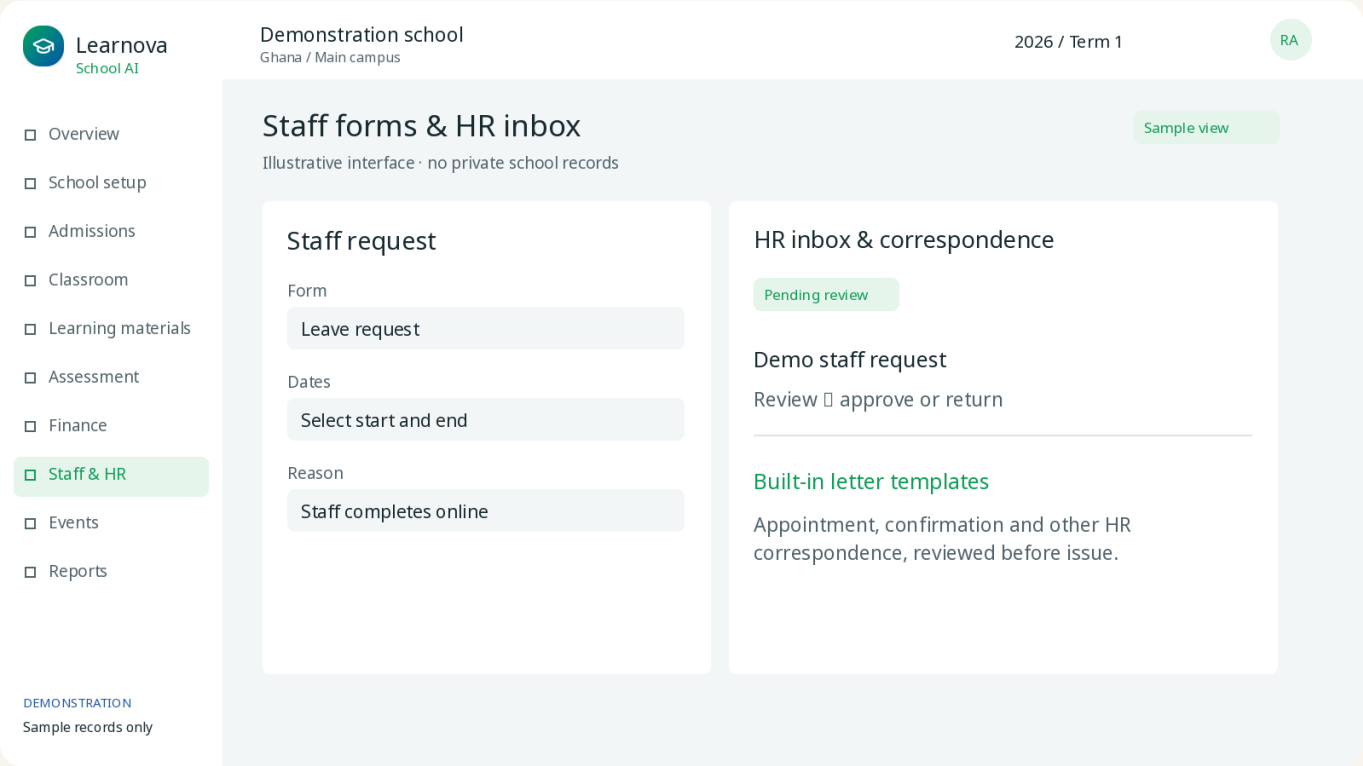
- Suppliers and procurement workflows
- Purchase orders and approvals
- Expense and finance-record connection

The school and its accountant should agree capitalisation policy and accounting treatment. Decorative asset tags are not represented as tested scannable barcodes.

A CONTROLLED STAFF JOURNEY

Consistent HR administration with direct staff self-service.

Recruitment, records, requests and correspondence sit in one workflow, with review before action or issuance.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Staff journey

- Directory, roles and staff records
- Recruitment and onboarding
- Contracts, leave and appraisals

02

Online self-service

- Staff fill and submit HR forms online
- Leave and other requests reach the HR inbox
- Review, approval or return for follow-up

03

Letters & payroll

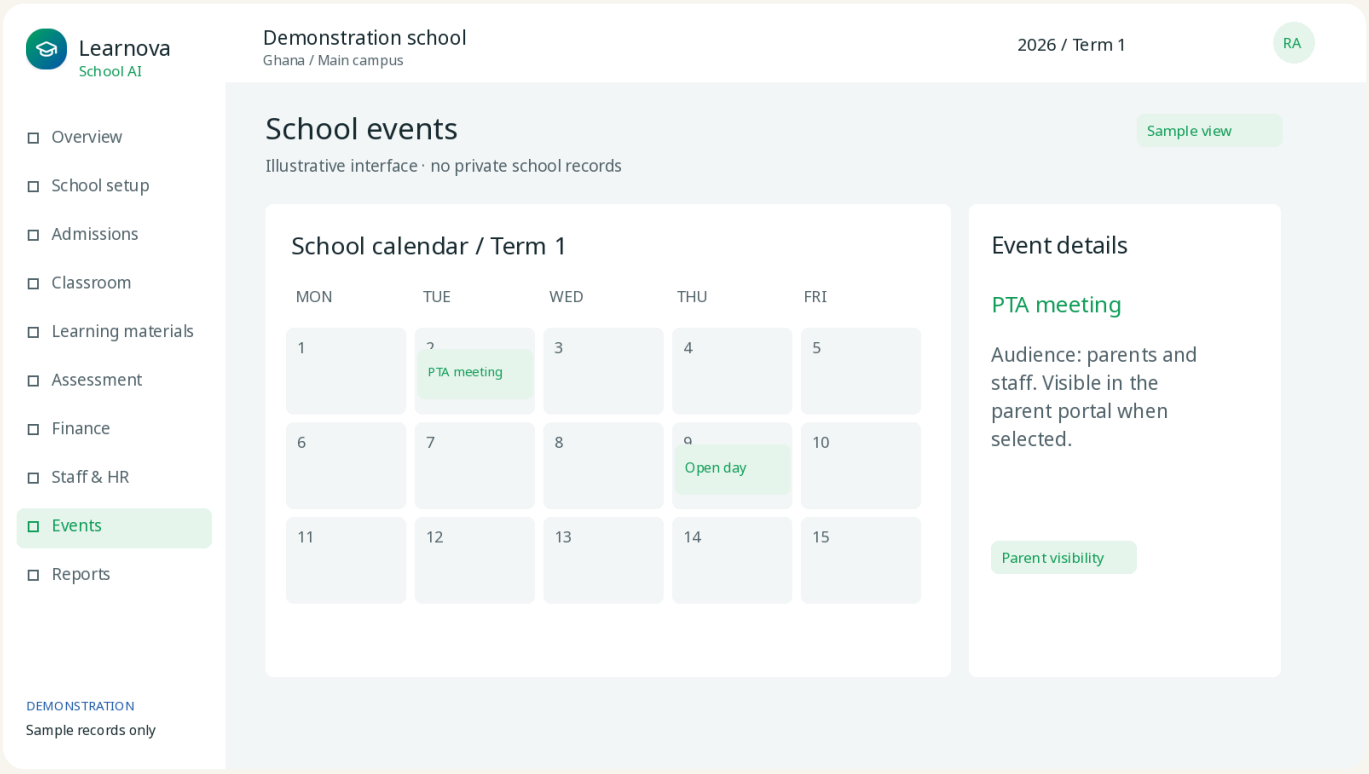
- Built-in formatted HR letter templates
- Issued correspondence retained with the record
- Payroll connection and payslip workflows

HR templates should be reviewed against school policy and applicable employment requirements before issuance. Payroll controls follow the school’s configuration.

CARE & LOGISTICS

Support the learner beyond the classroom.

Operational teams use relevant student information for their own responsibilities without receiving unrestricted access.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Transport & boarding

- Routes, vehicles, drivers, riders and trips
- Pickup authorisation and parent transport view
- Houses, allocations, roll call, leave and welfare

02

Health & library

- Clinic visits, profiles, medications and allergies
- Immunisations and incident records
- Physical catalogue, loans, returns and reservations

03

Events & resources

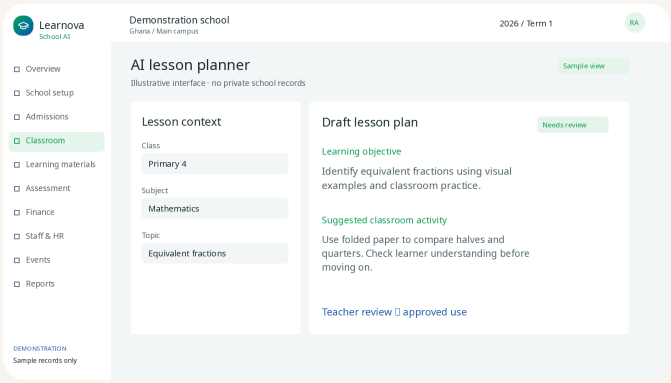
- School events with parent visibility
- Documents and operational inventory
- Support requests and workflow follow-up

Health, welfare and safeguarding information needs particular care. Configure only the services your school provides and verify every role boundary.

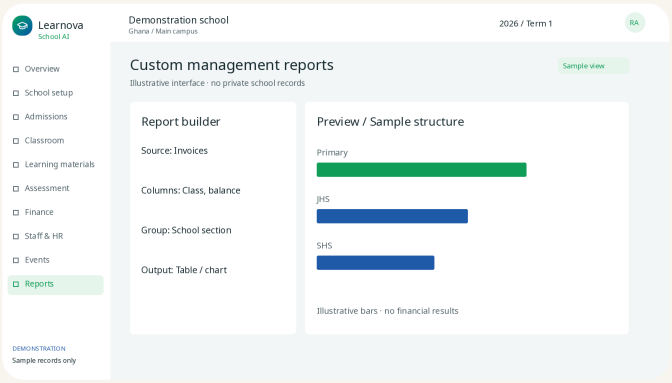
PEOPLE REMAIN IN CONTROL

AI drafts. Staff decide. Records become useful reports.

Assistance, reporting and customer support sit inside the school’s working context.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

AI assistance

- Lesson and term-plan drafting
- Quiz generation and report-comment drafts
- Risk insights and finance copilot
- Staff review before approved action

02

Dashboards & custom reports

- Academic, finance, attendance and operations views
- Permitted sources, columns, filters and grouping
- Tables, charts and reusable saved reports
- CSV, PDF or print-oriented exports

03

Nova customer service

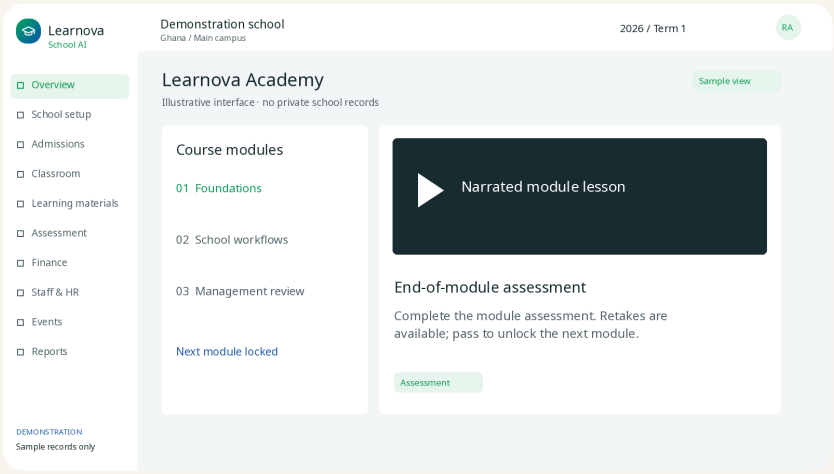
- Support-request collection and ticket creation
- Owner email notifications for customer tickets
- Private technical-error escalation
- Users are not told technical error details

AI output can be wrong or incomplete. It is not the final authority on a pupil, payment or policy. Report quality depends on the underlying records.

PROFESSIONAL LEARNING & ADOPTION

Build confidence one module at a time.

Structured programmes combine narrated lessons, downloadable resources, assessments and verifiable Learnova completion records.



UNIVERSAL ACADEMY PRICING

Essential Skills	$49
Certificate	$79
Professional Certificate	$99

ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Learn

- Narrated module lessons
- Downloadable workbooks and slide packs
- Course categories and catalogue search

02

Demonstrate understanding

- Assessment at the end of every module
- Retakes available; pass to unlock the next
- Programme completion requirements

03

Enrol teams

- Self-service selection for 2–100 seats
- Online checkout and one-time learner links
- Unique certificate serials and public verification

TRAINING PROVIDER RECOGNITION

Applied Synergy Plus Consulting LLC is an accredited training provider.

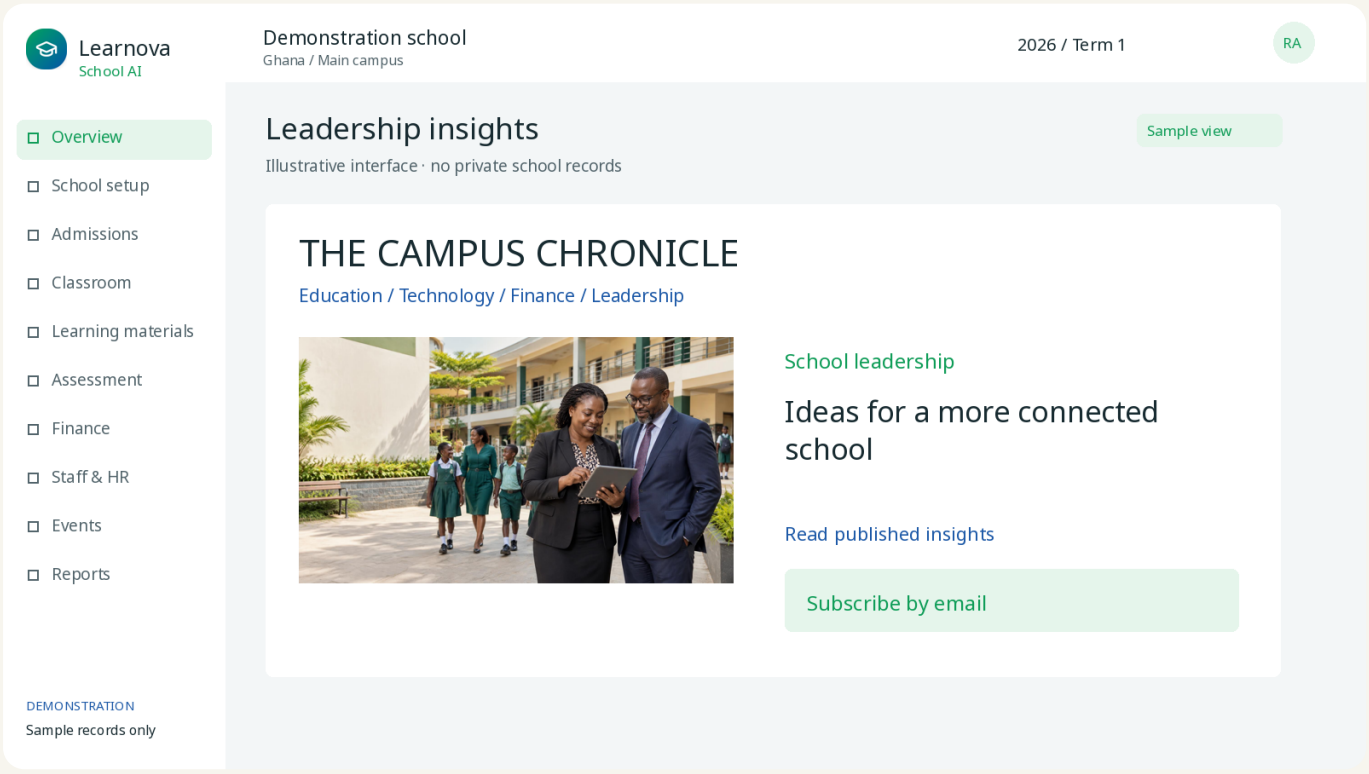
CPD Board Accredited Trainer · Listed on The CPD Register · Greening Education Partnership member

Live group checkout requires payment activation. Certificate verification confirms a Learnova record; it does not imply endorsement by an external standards issuer.

THE CAMPUS CHRONICLE

Keep leadership learning between product decisions.

Learnova's public publication connects education, technology, finance and leadership, while tutorials and Academy learning support adoption.



ILLUSTRATIVE INTERFACE · SAMPLE DATA ONLY

01

Read & discover

- Published leadership and education articles
- Categories, authors and search
- Regional education and technology insights

02

Subscribe by choice

- Voluntary email subscription
- Confirmation and unsubscribe routes
- Editorial and delivery operations need review

03

Adopt with support

- Product tutorials and tailored demonstrations
- Academy module assessments and resources
- Customer Service and support-ticket routes

The Campus Chronicle is a public insight publication, not a private parent noticeboard. No subscriber totals, cadence or engagement outcomes are claimed.

SECURITY, DATA SAFETY & READINESS

Controls are part of the workflow. Activation is stated plainly.

Learnova combines role permissions, ward-linked access, protected media and verified payment records. Your school's policies and provider setup complete the operating picture.

01

Access boundaries

- Individual sign-in and role-based permissions
- Same-school staff and linked-class family checks
- Private Academy and school learning-media access

02

Payment integrity

- Server-side invoice amounts and parent checks
- Provider confirmation before settlement records
- Signed webhooks and restricted payment/order tables

03

Governance & review

- Audit trails and controlled reporting sources
- Privacy, DPA, security and data-request routes
- School review of HR, accounting and safeguarding policies

SERVICE READINESS CHECKLIST

Core school records & workflows	Available to configure and test
Ghana mobile money collection	Paystack credentials and end-to-end testing required
Card subscriptions & group checkout	Stripe live activation and successful settlement verification required
SMS, email, WhatsApp & push	Relevant provider, templates and delivery checks required
Shared records & live payments	Internet connectivity required; no blanket offline claim

Security features support good operating practice; they are not presented as a compliance certification. Test permissions and providers with authorised controlled records before rollout.

A MEASURED PATH TO ADOPTION

See your workflow. Agree the pilot. Verify the value.

A tailored demonstration connects the people responsible for the process and focuses on the school's most important operational priority.

01

Book a tailored demo

- Name, school email, school name and role
- Choose the workflow or demo type
- The team follows up within 24 hours

02

Configure the foundation

- Sections, classes, subjects and academic terms
- Fees, grading, staff and guardian permissions
- Provider and communication requirements

03

Run a controlled pilot

- Start with a priority workflow and agreed records
- Compare effort and clarity with the current process
- Resolve access, handover and reporting questions

04

Roll out with learning

- Train staff through relevant Academy modules
- Phase departments and campuses deliberately
- Review support, charges and success measures
